Saphi original music - think Fred Again...

Using live guitar, Vocals, Midi (drum pad & keyboard), samples and Ableton Live, saphi builds indie-dance / melodic house tracks on stage in real-time.

Although seemingly complex, it could turn out to be a sound engineers dream! With the show mixed on saphi's laptop, all you have to worry about is main out, 2 jacks - 1xL & 1xR. We have mixing/EQ in the DAW, so please do get involved and chat during sound-check to adjust sound to the venue.

//INPUTS	//FUNCTION	//MODEL
MIC	VOCALS	SM58
